DETAILED OFFICE ACTION

Allowable Subject Matter

Claims 1-29 are allowed.

Reason for Allowability

The following is an examiner's statement of reasons for allowance: the primary reason for the allowance is the including, *in combination with other limitations recited in the claims*, the following:

An electrical current collector system, as in claim 1, or a rotating transformer system, as in claim 15, each system particularly comprises *a hollow conically shaped insulator having a frustum with a narrower cross-sectional opening connected to the conductive ring channel and a larger diameter cross-sectional portion passing through and connected to the compartment for exhausting the fluid from the current conductive ring channel.*

Comparing to the prior-art of the record, the most relevant prior art is US 6,465,926 which discloses the electrical current collector system and the rotating transformer with an electrical current collector system much similar to the present invention, but the patent does not disclose the conical insulator connected to the compartment for exhausting the fluid from the current conductive ring channel. The other relevant reference is US 5,923,113 which discloses the collector chamber arranged in the fixed section and an outlet pipe lead the gaseous medium out of the tubular rotating section, wherein the protective casing provides a collector chamber for the gaseous medium, but the patent does not disclose a conical insulator connected to the compartment for exhausting the fluid from the current conductive ring channel. Thus, none of the prior art references of the record, either stand-alone or in combination, has taught or suggest the above-mentioned features in combination with other limitations recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
